

# FACILITIES & BREEDING CAMPS

## THE BREEDING CAMPS

- The current facilities stretches over 994 hectare.
- The facilities entails fully electrified “camp systems” which is divided into camps of 40-60 hectares.
- These predator proof camps are constructed in a way that the young bulls can be separated from the breeding herds as well as the handling of possible sick animals.
- The camps are situated towards the center of the farm and there are no public roads through the farm.
- The camp systems also have smaller camps, with separate entrances equipped with water and feeding facilities that are used as maternity camps.
- 90 Hectares are being used for buffalo breeding

## THE MANAGEMENT

- Each animal is monitored and fed individually on a daily basis, 365 days of the year and are tagged and micro chipped for identification of ownership.
- A local vet is on standby only 35km away.
